Experience

Software Engineering Intern, *Eddium* 06/2026 – 08/2026
Tunis, Tunisia
- Built Eddium, a gamified IELTS/TOEFL vocabulary trainer, with React Native, Node.js, Firebase and REST APIs (source).
- Integrated the Gemini API into the admin dashboard to generate quiz questions for the app's learning content.
- Wrote automated unit tests to verify the application's behavior.

Web Development Intern, *Yellomind* 06/2025 – 08/2025
Dubai, UAE
- Developed and maintained responsive web applications with HTML5, CSS3, JavaScript, jQuery and PHP.
- Cut maintenance overhead by 30% on multi-site web applications through architecture improvements.
- Worked with cross-functional teams to deploy and maintain web solutions in production.

English Language Teacher (Volunteer), *AIESEC* 05/2024 – 07/2024
Kocaeli, Turkey
Taught English to 15+ students from 5+ nationalities through AIESEC's global volunteer exchange program.

Engineering Intern, *Asteelflash* 06/2023 – 07/2023
Tunis, Tunisia
Resolved 20+ technical support tickets and configured networks and software on 10+ workstations in a manufacturing environment.

Education

Engineering Degree in Software Engineering, *MedTech, South Mediterranean University (SMU)* 2022 – 2027
Tunisia

Technical Skills

Languages
Python, SQL, Java, JavaScript, C

LLMs and agents
LangChain, Claude API, Gemini API, IBM watsonx.ai, Ollama (Llama 3.2), Streamlit, agentic workflows, NLP

Frontend
React, React Native, Next.js, JavaScript, HTML, CSS, Flutter

ML and data
PyTorch, scikit-learn, pandas, torchaudio, Hugging Face, sentence-transformers, FAISS, spaCy

Backend and cloud
FastAPI, Flask, Node.js, Express, REST APIs, PostgreSQL, MySQL, Firebase, Docker, Azure (Container Apps), Git/GitHub, Linux

Projects

InternPact: AI internship recommender, *Python, FastAPI, Claude API, sentence-transformers, FAISS, spaCy, React, Vite*
- Parsed PDF, DOCX and text CVs into skills, education and experience with an LLM (Claude, with Gemini and rule-based fallbacks).
- Ranked live internship offers from the JSearch API with a hybrid candidate-job score, explained with a skill-gap analysis and a learning path.
- Compared four matching strategies (keyword matching, TF-IDF, sentence-transformer embeddings, LLM reasoning) using Precision@5, Recall@5 and NDCG@5.

Heart Disease Prediction, *Python, pandas, scikit-learn, Flask, Chart.js*
- Found and removed 723 duplicate rows (70.5% of the 1,025-row UCI dataset) that leak between train and test sets and inflate scores, so the reported results are honest.
- Trained a logistic regression reaching 77% accuracy and 90% recall on positive cases.
- Built a Flask API and a Chart.js dashboard: upload a CSV, explore it visually, and get a risk prediction with a confidence score for a single patient.

DevBoard: containerized task board, *React, Node.js, Express, PostgreSQL, Docker, Azure Container Apps*
- Built a React frontend, a Node/Express REST API and a PostgreSQL database, packaged with Docker.
- Deployed it to Azure Container Apps with a managed Azure Database for PostgreSQL, to demonstrate a complete deployment pipeline end to end.

Audio Emotion Recognition (team project), *PyTorch, torchaudio, Hugging Face, FastAPI, Unreal Engine 5*
- Built a speech emotion recognition pipeline on a pretrained model, with audio preprocessing and confidence-based prediction handling.
- Served inference as a Python/FastAPI service whose predictions drive character and environment responses in Unreal Engine 5.

Natural Language SQL Agent (IBM course project), *Python, LangChain, IBM watsonx.ai, MySQL*
Built an agent that turns plain-English questions into SQL, runs them on a MySQL database and returns the relevant data.

Certificates

- Building AI Agents and Agentic Workflows Specialization, Meta
- Fundamentals of Building AI Agents, IBM
- AI and ML Engineering, Microsoft
