EXPERIENCE

Software Engineering Intern, *Eddium* 06/2026 – 08/2026 | Tunis, Tunisia
- Built an educational RPG-style mobile app for vocabulary learning with React Native, Node.js, Firebase and REST APIs.
- Integrated the Google Gemini API into the admin dashboard to generate questions for the app's learning content.
- Wrote automated unit tests to verify the application's behavior.

Web Development Intern, *Yellomind* 06/2025 – 08/2025 | Dubai, UAE
- Developed and maintained responsive web applications with HTML5, CSS3, JavaScript, jQuery and PHP.
- Cut maintenance overhead by 30% on multi-site web applications through architecture improvements.
- Worked with cross-functional teams to deploy and maintain web solutions in production.

English Language Teacher (Volunteer), *AIESEC* 05/2024 – 07/2024 | Kocaeli, Turkey
Taught English to 15+ students from 5+ nationalities through AIESEC's global volunteer exchange program.

Engineering Intern, *Asteelflash* 06/2023 – 07/2023 | Tunis, Tunisia
Resolved 20+ technical support tickets and configured networks and software on 10+ workstations in a manufacturing environment.

EDUCATION

Engineering Degree in Software Engineering, 2022 – 2027 | Tunisia
MedTech, South Mediterranean University (SMU)

PROJECTS

Heart Disease Prediction, *Python, pandas, scikit-learn, Flask, Chart.js*
- Cleaned the UCI heart disease dataset (removed 723 duplicates, 70.5% of 1,025 rows) and trained a logistic regression reaching 77% accuracy and 90% recall on positive cases.
- Built a Flask API and a Chart.js dashboard where users upload a CSV, explore it visually, and get a risk prediction for a single patient.

InternMatch: explainable AI internship recommendation system, *Python, React, sentence-transformers, LLMs*
- Building an end-to-end pipeline: LLM-based CV parsing, live job retrieval, hybrid candidate-job scoring and explainable recommendations, served through a React dashboard.
- Compared four matching strategies (keyword matching, TF-IDF, sentence-transformer embeddings, LLM reasoning) using Precision@5, Recall@5 and NDCG@5.

Audio Emotion Recognition, *Team project | PyTorch, torchaudio, Hugging Face, FastAPI, Unreal Engine 5*
- Built a speech emotion recognition pipeline on a pretrained model, with audio preprocessing and confidence-based prediction handling.
- Deployed inference as a Python/FastAPI service and integrated predictions into Unreal Engine 5 to drive character and environment responses.

Natural Language SQL Agent, *IBM course project | Python, LangChain, IBM watsonx.ai, MySQL*
Built an agent that turns natural-language questions into SQL queries and runs them on a MySQL database to return the relevant data, using an IBM watsonx.ai LLM through LangChain.

CERTIFICATES

Building AI Agents and Agentic Workflows Specialization, *Meta*

Fundamentals of Building AI Agents, *IBM*

AI and ML Engineering, *Microsoft*

TECHNICAL SKILLS

LLMs and agents
Python, LLM applications, agentic workflows, NLP, Hugging Face, sentence-transformers, LangChain, IBM watsonx.ai, Gemini API, Ollama (Llama 3.2), Streamlit

Frontend
React, Next.js, React Native, JavaScript, HTML, CSS, Flutter

Programming Languages
Python, Java, JavaScript, C, SQL

Backend and integration
FastAPI, Revit API, pyRevit, Node.js, REST APIs, PostgreSQL, MySQL, Firebase/Firestore, Docker, Git/GitHub, Linux

ML
PyTorch, scikit-learn, Pandas

LANGUAGES

Arabic
Native

English
Fluent

French
Proficient
